

About Us - Tyrant UAV

- One of the best UAV exporter from China.

Tyrant UAV(TU for short) is a high-tech company with ability to develop & customized flight control system & complete UAVs: like Security UAV, Agriculture UAV, Professional UAV, etc

Tyrant UAV was founded in 2013, the headquarters is located in the Suzhou, is a well-known collection of UAV technology research and development, production, sales, service, training as one of the comprehensive science and technology enterprises.

Tyrant UAV provides customers with all kinds of complete flight services and technical support, so that we have always maintained a good reputation and credibility among many customers.

"We try as much as possible to give clients great products and what comes out, I feel, is really amazing."
- by Max.Lu | CEO of Tyrant UAV

Tyrant UAV is a price tag, in partnership with AOPA, and many heavyweight customers.

Why us

Tyrant UAV has applied for more than 400 intellectual property rights, including more than 80 invention patent applications and 18 PCT applications, and has been recognized as a high-tech enterprise in China.

Plant protection UAV products were exported to Spain, France, Italy, Czech Republic, Thailand, Sri Lanka, Turkey, Colombia, South Africa, Malaysia and other more than 30 countries.

- 1) Low failure rate & Long service life.
- 2) Own UAVs & Flight control systems.
- 3) Over 100 patents & Over 200 researchers.
- 4) Low price for clients & Lower for dealers

Team

Research Center

Tyrant UAV research center is partner of many research institute, NUAU and other universities.

Tyrant UAV has applied over 100 patents and 150 invention patents.

The 1# R&D Center is in Suzhou.
The 2# R&D Center is in Wuxi.

Factory

Tyrant UAV 1# Factory is in Yancheng.
The 2# Factory is in Qingdao. A quite automatic one.
The 3# Factory is new bought , its in Hangzhou.

Supply ability would be over 13,000 sets per year.

Sales Department

Overseas Sales Department is in Suzhou.

Different languages' service:

1. English
2. Arabic
3. French
4. Spanish

Service Team

1. Delivery
2. Install & Uinstall
3. Using & Pilot Training
4. Repair
5. Spare Parts
6. Quality Guarantee

Different fields

Tyrant UAV integrates modern aviation, high-end manufacturing, Internet + and big data technology, takes the market as the guide, based on the overall solution of industry application solutions, focuses on the layout of agricultural plant protection, fire fighting, and other industry application fields, to provide our customers with accurate and efficient aviation services.

Including fire fighting, aerial photography, power line patrol, agriculture and forestry spraying seeding, land mapping, oil pipeline patrol, forest fire prevention, emergency relief, geological survey and other fields.

Agriculture

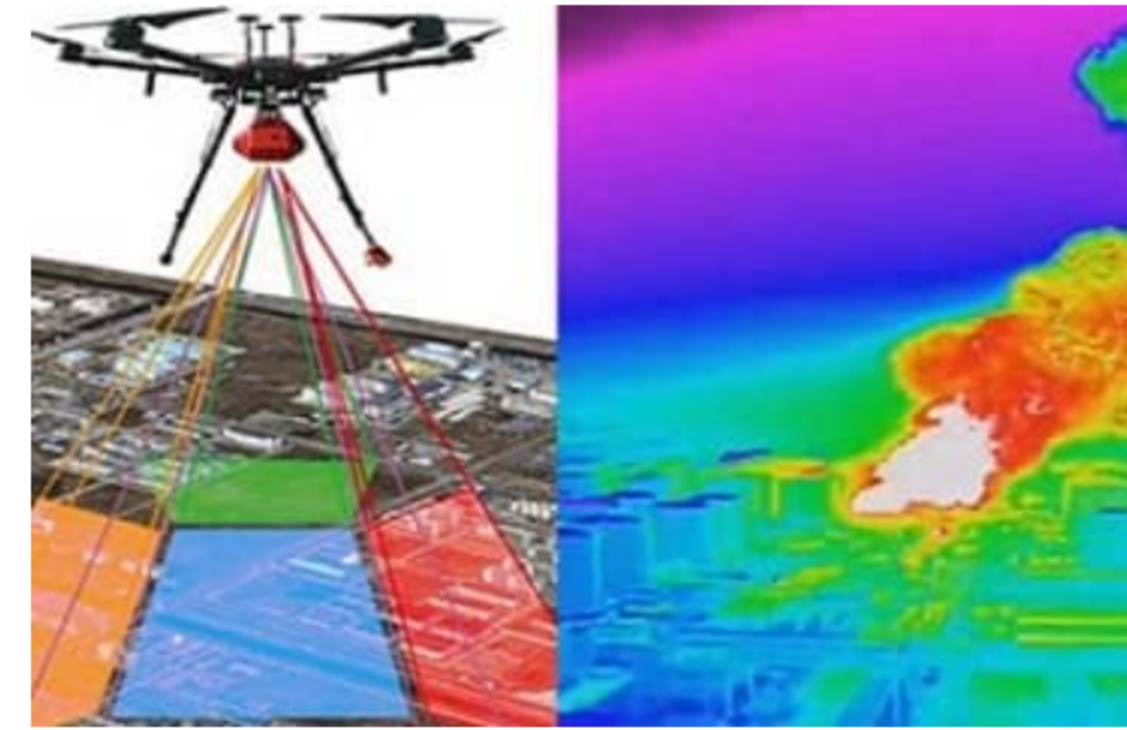

Water spraying, pesticide spraying, and crop monitoring on farms, ranches, or plantations.

Will effectively improve agricultural efficiency and reduce labor consumption.

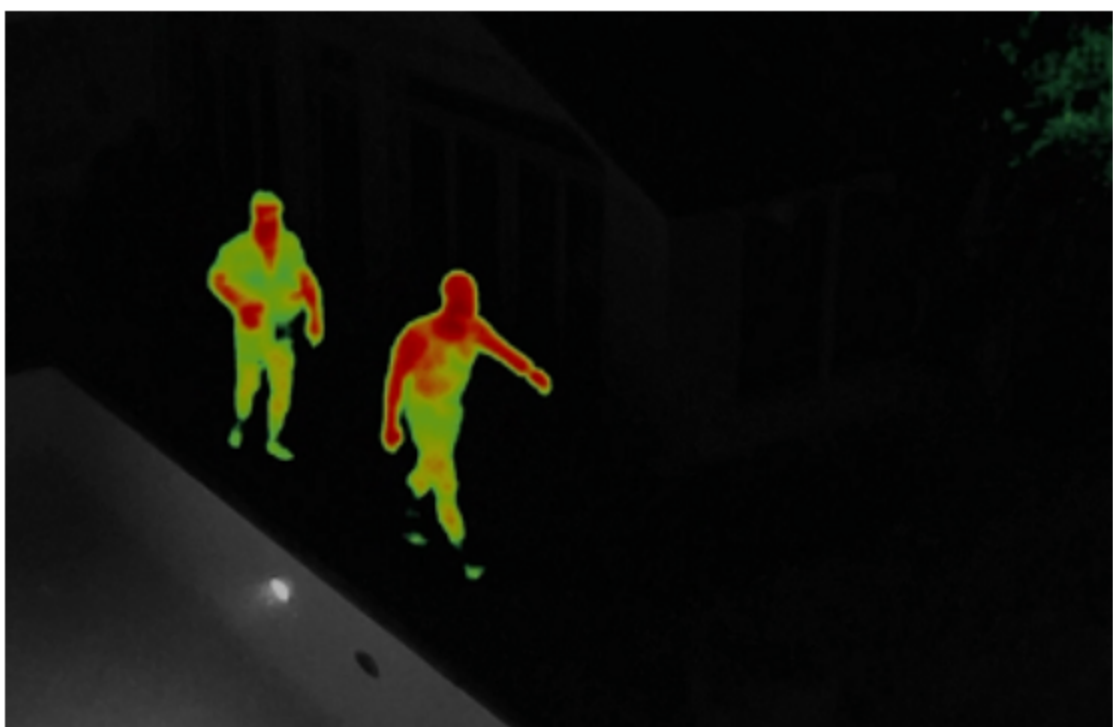

Surveying & Mapping

Applied to mapping, modeling or planning of buildings, waters, geography, mining and oil industries .etc.

Fire Fighting & Rescue

Drones can help find the fire point, determine the fire range, fire, etc., can carry and drop fire extinguishing materials, and can also be used in field rescue, mainly through different camera to find people or objects to be rescued.

Security

UAV can be used for the security purposes.

Zone-Safety

UAV can effectively guarantee the security of the area like factory zone.

Often be used in areas such as oil fields and goods production areas.

High & Long Distance

Flight height upto 5,000m.

Flight duration upto 1,800km

Tyrant UAV Technology

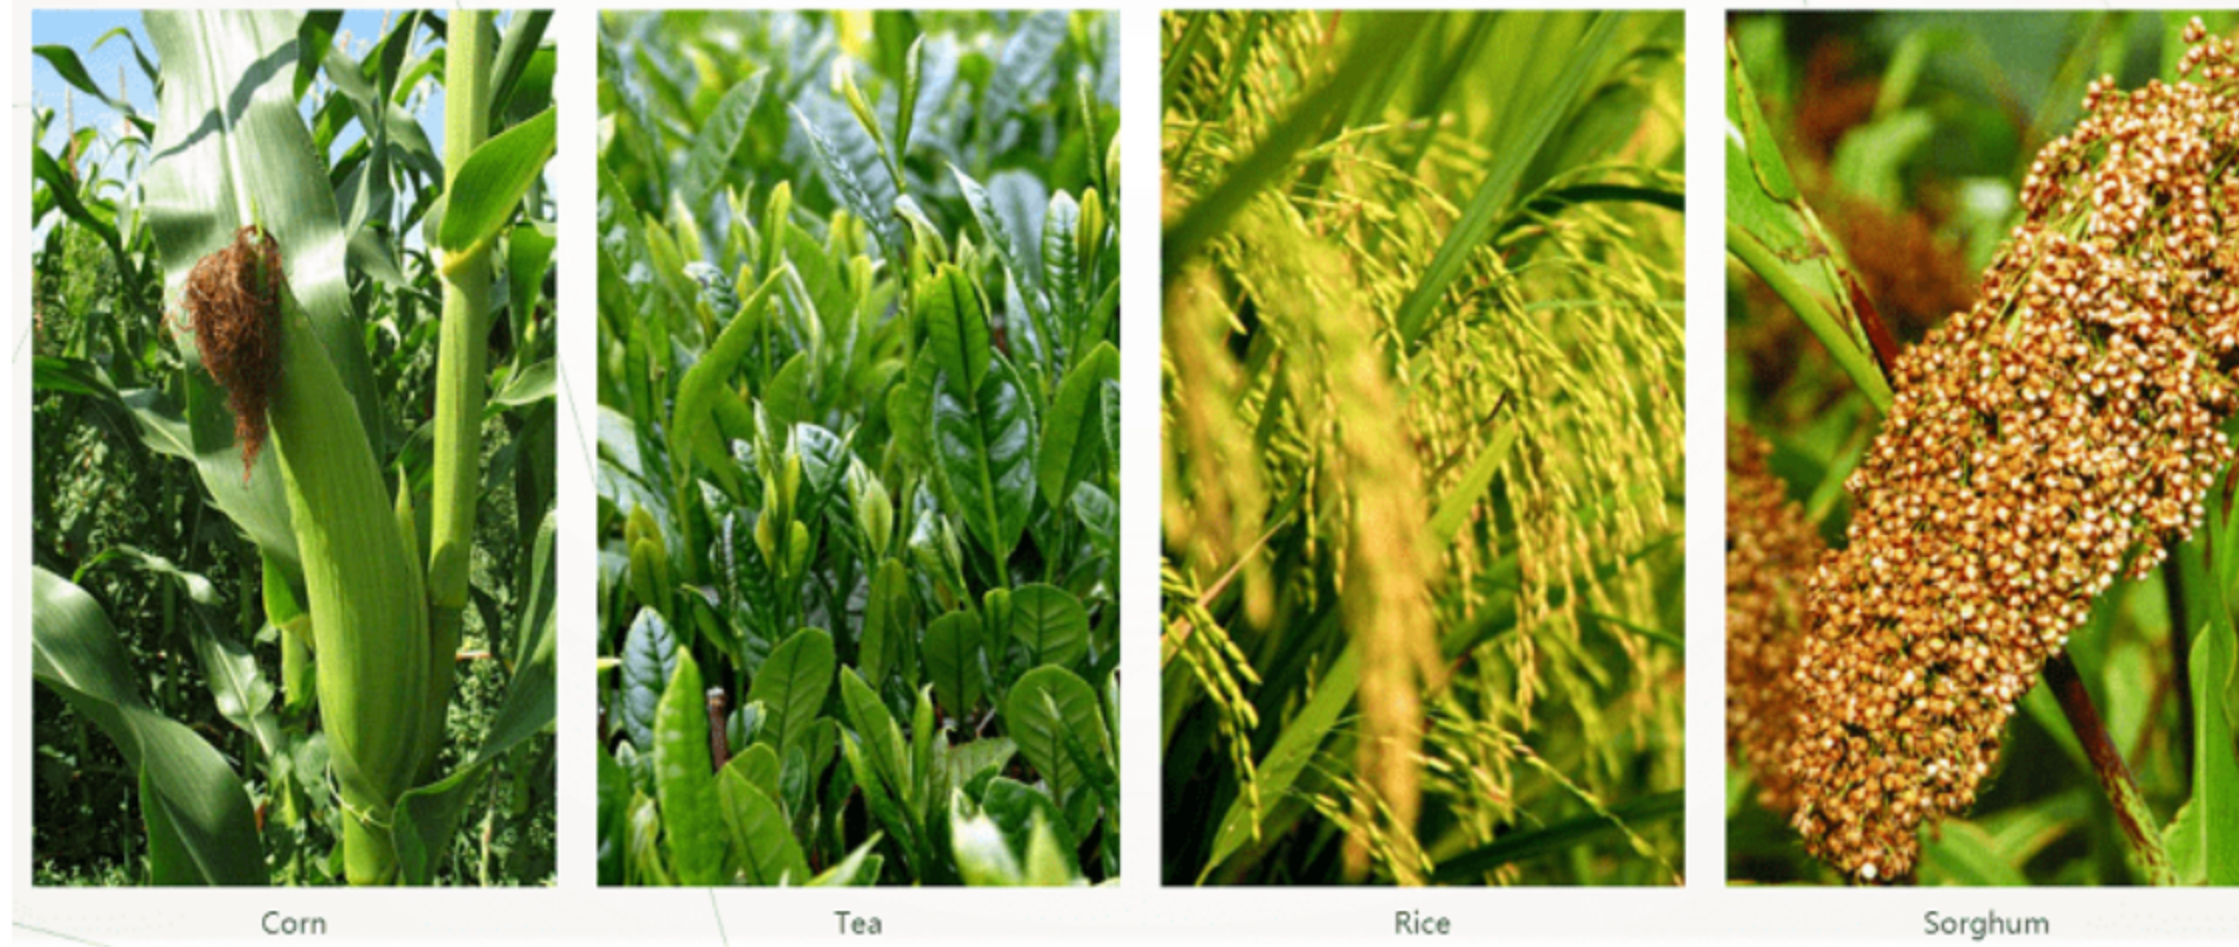

(Focus on UAV Manufacture & Export from China)

Swift Series UAV save the farm cost

Plantation L*lin in Thailand, which grows a lot of fruit, about 40mile², requires crop monitoring, pesticide spraying and so on, uses 5 Swift 16 and saves \$150,000 a year.

Effective and precise pesticide spraying and timely crop monitoring data also increased yields by 3%

[View Swift Series](#)

Eagle Series UAV Protects

An oil field in Nigeria, where production areas need to be secured, uses 12*Eagle 6 UAVs, 8*Shield 1 and an array of 4*Shield X1. Unlike humans, machines are accurate, efficient, and make no mistakes.

Up to hundreds of meters of image monitoring and warning, keep the danger away.
